

AUTOVERKKOKAUPPA

Ruukki profiles on the longest light-controlled facade in Finland

Renovation of the car showroom and workshop included some major changes. The building was given a more impressive look by raising the façade height by two metres and using perforated steel profiles in the cladding. Backlighting was installed in the profiles for added impressiveness. With a length of 130 metres, Autoverkkokauppa.fi's façade is the longest LED light-controlled façade in Finland.

Ruukki delivered around 2000 square metres of Ruukki's Design Tokyo S18 façade profiles.

Ruukki's delivery: 2017

- > Ruukki Design Tokyo S18 (2000 m²)
