

# OSUUSPANKKI BANK

## Renovated building with Ruukki Emotion facade system

Ruukki delivered the copper, bronze-coloured façade for the renovated bank building. Copper design profiles were also used for the cladding of the machine room on top of the roof of the building.

In the bank hall, LED lights have been placed behind a light perforated steel profile to create a sense of space and light, and to brighten up this almost windowless area.

## OP Kouvola - Titus Verhe
